EDUCATION

University of Central Florida

Bachelor of Science in Computer Science, Minor Computer Engineering

Orlando, FL

Spring 2027

EXPERIENCE

Workshop Team Member

Knight Hacks

Aug 2025 – Present

Orlando, FL

- Directed UI/UX and front-end workshops for **600+** Knight Hacks members, improving design-to-code fluency by guiding students from Figma prototypes to responsive builds with **Tailwind CSS and Next.js**.
- Applied advanced knowledge of **TypeScript and JavaScript** to deliver hands-on training sessions, enabling peers to adopt industry-standard UI workflows through live coding and collaborative problem-solving.
- Introduced libraries such as **framer-motion**, mentoring students on integrating animation into projects to design interactive UI components that enhance user engagement and usability.

Software Engineer Intern

Dahiana Rojas de Rojas LLC

Jun 2025 – Present

Miami, FL

- Achieved a **60%** reduction in average lead response time by automating pipeline workflows and task assignments through **HubSpot** and **BoldTrail API** integrations orchestrated with **N8N**.
- Boosted social media-driven lead acquisition by **340%** by implementing automated content scheduling, posting, and **Meta Ads API workflows** via BoldTrail.
- Streamlined client onboarding by developing custom automation sequences, reducing manual data entry **by 75%**.
- Increased qualified lead conversion rates by **45%** by implementing real-time lead scoring and follow-up triggers through **HubSpot workflows** and **BoldTrail API** automations.

PROJECTS

ReCueCareer | *Next.js, TypeScript, Python, Flask, Tailwind CSS, Supabase, Auth0*

Jul 2025 – Present

- Built a **Python** scraping pipeline using **bs4**, resulting in the extraction of **100+** personalized job postings per user session, by transforming data through **Sentence-Transformers** embeddings.
- Designed and implemented secure onboarding and authentication with **Auth0 and Supabase**, enabling seamless account creation and personalized content delivery for early users, while ensuring scalability for future growth.
- Engineered a full-stack dashboard with **Next.js, TypeScript, and Tailwind CSS**, resulting in real-time visualization of tailored job insights, by integrating Python APIs with modular **React components**.

iPalo | *Swift, C++, Python, ARKit, ElevenLabs API, ESP32 Microcontroller, LRAs, 3D Print, CAD*

Oct 2025

- Won **1st place** (out of 22 teams) for **Best Use of ElevenLabs** at Knight Hacks VIII by developing an iPhone 16 Pro Max **LiDAR-powered** assistive device that delivered directional haptic feedback to replace the white cane for blind users.
- Developed an iOS app in **Swift with ARKit** that integrated a **Python** based pipeline to convert voice commands into real-time environmental audio descriptions (**~5 sec** latency) using **Gemini API** and **ElevenLabs API**.
- Prototyped a **LiDAR-driven** haptic navigation system using Linear Resonance Actuators (**LRAs**) and an **ESP32 microcontroller** via Core Bluetooth to provide directional feedback and enhance spatial awareness for blind users.

Face2Learn | *HTML, CSS, JavaScript, Python, MySQL, Gemini API, Figma*

Sep 2025

- Built a Chrome extension using HTML and Tailwind CSS in **under 36 hours** that delivered real-time facial emotion recognition at **65% accuracy**, enabling autistic learners to better interpret social interactions.
- Implemented a **Kaggle** facial expression dataset by integrating **TensorFlow and CNN** with **Haar cascade** detection for efficient, lightweight on-device analysis.
- Enhanced user accessibility by developing non-intrusive YouTube overlays with **Tailwind CSS + Canvas API**, resulting in a seamless, privacy-first learning experience.

TECHNICAL SKILLS

Languages: Python, TypeScript, Swift, CSS, HTML, Java, JavaScript, SQL.

Frameworks/Libraries: Selenium, Flask, bs4, Tailwind, Next.js, React, PyTorch, Gemini, Scikit, NumPy, SciPy, SentenceTransformers, CNN, Haar, TensorFlow.

Tools/Platforms: Linux, Windows, MacOS, XCode, JetBrains CLion & IntelliJ, GitHub, Notion, IDLE, VS Code, MobaXTerm, WSL, N8N, Figma, Docker, Supabase, BoldTrail, HubSpot, MySQL, AWS, Vercel, MongoDB, Hugging Face.
